Analyzing Causes and Recognizing Effects

Complete the chart below by writing the six main causes of industrial growth in the United States in the years from 1860 to 1914.

Read the cause and effect statements below. In the blank before each item, write **T** if the statement is true and **F** if it is false.

- _____ 1. When customer spending and business investment decrease, industries grow and hire more workers.
- _____ 2. The Bessemer steel process increased the cost of making iron into steel.
- _____ 3. The effect of Thomas Edison's light bulb on America was the widespread use of electric light instead of gas light.
- _____ 4. One of the effects of the invention of the sewing machine was that people began to buy ready-made clothing in standard sizes.
